

Tenth Biennial Ptolemy Miniconference

November 7, 2013

<http://ptolemy.eecs.berkeley.edu/ptconf>

8:00 am to 8:30 am	Continental Breakfast
8:30 am to 9:00 am	<i>Ptolemy Miniconferences</i> , Edward Lee (Berkeley)
9:00 am to 9:20 am	Aspect Oriented Models and CPS, Patricia Derler (Berkeley)
9:20 am to 9:40 am	Aspect-Oriented Fault Modeling and Anomaly Detection, Ilge Akkaya (Berkeley)
9:40 am to 10:00 am	Attack Modeling in Ptolemy: Towards a Secure Design for Cyber-Physical Systems, Armin Wasicek (Berkeley)
10:00 am to 10:30 am	Break
10:30 am to 10:50am	Developing Faithful Models of Body Sensor Networks, Philip Asare, John Lach, and John A. Stankovic (University of Virginia)
10:50 am to 11:10am	Light-Weight Synthesis of Ptolemy Diagrams with KIELER, Ulf Ruegg, Christian Schneider, Christoph Daniel Schulze, Miro Sponeman, Christian Motika, and Reinhard von Hanxleden (University of Kiel)
11:10 am to 11:30am	Modeling user interfaces with Cal and Ptolemy, Hallvard Traetteberg (Norwegian University of Science and Technology)
11:30 am to 12:00 pm	<i>90 second Poster Tweets</i>
12:00 pm to 2:20 pm	Working Lunch and Poster Session
2:20 pm to 2:40 pm	Efficient Schedulability Testing for Ptides, Christos Stergiou (Berkeley)
2:40 pm to 3:00 pm	A Formal Analysis of the Ptolemy II Type System, Chris Shaver, Marten Lohstroh (Berkeley)
3:00 pm to 3:20pm	Web Service Architecture for Composable, Interdisciplinary Applications, Elizabeth Latronico (Berkeley)
3:20 pm to 3:40 pm	Break
3:40 pm to 4:00 pm	<i>BPDF: A Statically Analyzable Dataflow Model with Integer and Boolean Parameters</i> , Vagelis Bebelis, Pascal Fradet, Alain Girault, and Bruno Lavigueur (INRIA)
4:00 pm to 4:20 pm	<i>System-level Synthesis of Dataflow applications for FPGA-based distributed systems</i> , Hugo Andrade (National Instruments)
4:20 pm to 4:40pm	<i>Dataflow in the Data Center</i> , Adam Cataldo (Wealthfront)
4:40 pm to 5:00 pm	<i>The Ptolemy Project: Advancing System Design</i> , Edward A. Lee (Berkeley)
5:15 pm to 8:00 pm	Reception and Dinner, The Faculty Club, Heyns room Dinner Speaker: Chamberlain Fong : Claudius Ptolemaeus, Geographer

Posters

Ilge Akkaya	Berkeley	<i>Real-Time Machine Improvisation in Ptolemy II</i>
Rajiv Bannerjee	IIS Banglaore	<i>Cyber Physical Systems – Rebirth of System Engineering</i>
David Broman	Berkeley	<i>Precision Timed Compilers</i>
Liangpeng Guo	Berkeley	<i>Bridging Functional and Architectural Aspects by Metro II Semantics</i>
Hokeun Kim	Berkeley	<i>A Tool Integration Approach for Architectural Exploration of Aircraft Electric Power Systems</i>
Eleftherios Matsikoudis, Christos Stergiou	Berkeley	<i>The act Programming Language</i>
Christian Motika, Steven Smyth, Reinhard von Hanxleden, Michael Mandler	University of Kiel	<i>SCCharts: Sequentially Constructive Charts</i>
Chris Shaver, Marten Lohstroh	Berkeley	<i>Backward Type Inference</i>
Chris Shaver, Marten Lohstroh	Berkeley	<i>Taxonomies of MoCs</i>
Stavros Tripakis	Berkeley	<i>Determinate Composition of FMUs for Co-Simulation</i>
Gerald Wang	National Instruments	<i>Communication Storage Optimization for SDF with Access Patterns under Periodic Scheduling and Throughput Constraint</i>
Edmund Widl, Wolfgang Muller, Elsheikh Atiyah, Peter Palensky	Austria Institute of Technology	<i>Linking FMI-based components with Ptolemy II's Discrete Event Domain.</i>
Michael Zimmer	Berkeley	<i>Timing Predictable Processors as a Platform for Mixed-Criticality Systems</i>
